BIRD BANDING IN WESTERN AUSTRALIA - 1992

CSIRO Division of Wildlife & Ecology is studying avian populations in remnants of vegetation and road verges in the wheat-belt of Western Australia.

Dr. Dennis Saunders is in charge of the research programme while Perry de Rebeira is the Senior Technical Officer running the bird banding project within the major programme.

Qualified banders, trainees or interested birdos, or students wishing to acquire or extend their bird-banding experience, are invited to join Perry on banding trips to the study area near Kellerberrin.

Field trip dates for 1992 are:-

23-27 March
13-24 April
11-15 March
15-19 June
13-17 July
14-18 September

Transport and accommodation on field trips is provided free of charge. A Field Allowance of \$10/day will be paid to volunteers except for the April Expedition, which will be differently structured. The maximum number of volunteers per trip is three.

See page 66 for a report on this programme.
